

# Why should we recycle our e-waste?

- Electrical products contain a mix of materials that can hurt our environment if we don't manage them safely and responsibly.
- If we dump our e-waste or allow it to go to landfill, dangerous materials like mercury and lead can leak into the soil and contaminate our rivers, oceans and underground water.
- TechCollect NZ recycles all e-waste and materials in a way that is safe and good for our environment.
- Our environment is important and we need to protect it by recycling all e-waste in a safe and responsible way.
